AMAN SHANDILYA

AI / MACHINE LEARNING | GENERATIVE AI | LLM POST-TRAINING & AI AGENTS

Mumbai, India | +91 85210 27649 | shandilyaprahaald@gmail.com | github.com/Aman678317

PROFESSIONAL SUMMARY

BMS student (2025–2028) with internship experience supporting AI data preparation and evaluation for large language model (LLM) post-training workflows, plus exposure to backend API development and AI product engineering. Skills include Python, machine learning and NLP fundamentals, generative AI, prompt engineering, data evaluation, and web/API technologies. Building GlobalTalk AI / TalkFlow, a multilingual video-calling prototype; also recognized as a contributor to AION Bot, a natural-language desktop automation agent. Seeking entry-level AI/ML, Generative AI, LLM Engineering, or AI Automation opportunities.

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, SQL/MySQL, PHP, HTML, CSS

AI / ML: LLM post-training workflows, data preparation, model evaluation, machine learning, deep learning fundamentals, NLP, generative AI, prompt engineering, speech/translation pipeline concepts

Backend / Web: REST APIs, FastAPI, Node.js, Express.js, React, Vite, Socket.IO, WebRTC

Tools: Git/GitHub, Cursor, GitHub Copilot, ChatGPT, Power BI, Microsoft Excel

PROFESSIONAL EXPERIENCE

LLM Post-Training Intern — Ethara AI (Virtual)

Feb 2026 – Apr 2026

- Supported data preparation and evaluation tasks for AI and data projects supporting large language model (LLM) post-training workflows.
- Contributed to data-processing and evaluation activities in line with project requirements and team workflows.

AI/ML Intern — Rajora AI (Virtual)

Nov 2025 – Jan 2026

- Contributed to backend API development for an AI-driven product, supporting backend services and product integration.
- Collaborated with AI/ML teammates on service integration and testing during the internship.

PROJECTS & TECHNICAL CONTRIBUTIONS

GlobalTalk AI / TalkFlow — Multilingual Video Calling

Independent Project | 2025 – Present

- Developed a two-person video-calling prototype with WebRTC signaling, local and remote video, microphone/camera controls, participant states, room/media cleanup, and responsive layouts.
- Designed the intended real-time translation workflow across speech recognition, language detection, machine translation, translated speech, synchronized captions, and optional lip-sync.
- Repository: github.com/Aman678317/TalkFlow

AION Bot — Desktop AI Agent

Rajora AI | Recognition issued Oct 2026

- Recognized by Rajora AI for contribution to a desktop-native agent designed to convert natural-language instructions into multi-step operating-system tasks.
- Project architecture includes a FastAPI backend, LangGraph agent workflow, Playwright browser automation, desktop-control tools, Model Context Protocol (MCP), real-time task updates, and policy-gated execution.
- Repository: github.com/rajeevrajora77-lab/aion-bot

EDUCATION

Bachelor of Management Studies (B.M.S.)

2025 – 2028

SIES College of Arts, Science & Commerce

Senior Secondary (Class XII), CBSE — Commerce

2025

Tilak Public School, Thane

TRAINING & ACHIEVEMENTS

Generative AI Mastermind — Outskill (Dec 2025): generative AI fundamentals, prompt engineering, ChatGPT/DALL·E workflows and no-code automation.

District-level Javelin Throw — Gold Medal · **District-level Volleyball — 3rd Place**
